

FLY ASH AND BOTTOM ASH UTILIZATION

INDONESIA POWER OCTOBER 13th 2022

4 Proper Emas PT Indonesia Power Tahun 2021
PLTGU Grati, PLTGU Priok, PLTDG Pesangaran,
PLTP Kamojang-Darajat.

Disclaimer

1. The success of faba utilization depends on the characteristic analysis of FABA and other material elements mixed with FABA, such as soil conditions, sand and gravel. In addition, the FABA utilization program refers to standards, procedures and regulations applied in Indonesia.
2. The data contained in this presentation material belongs to PT PLN Indonesia Power and cannot be used without the permission of PT PLN Indonesia Power.
3. If other parties copy this presentation material or use the data in this presentation without permission, then PT PLN Indonesia Power is not responsible for the consequences arising from the use.

CERTIFICATE OF FLY ASH & BOTTOM ASH CHARACTERISTICS ANALYSIS

Banten 3 Lontar CFSP	Fly Ash	63.15	16.88	9.23	4.4	1.93	0.1	0.44	0.68	2.48	F
	Bottom Ash	63.15	16.88	9.23	4.49	1.93	0.1	0.44	0.68	2.48	F

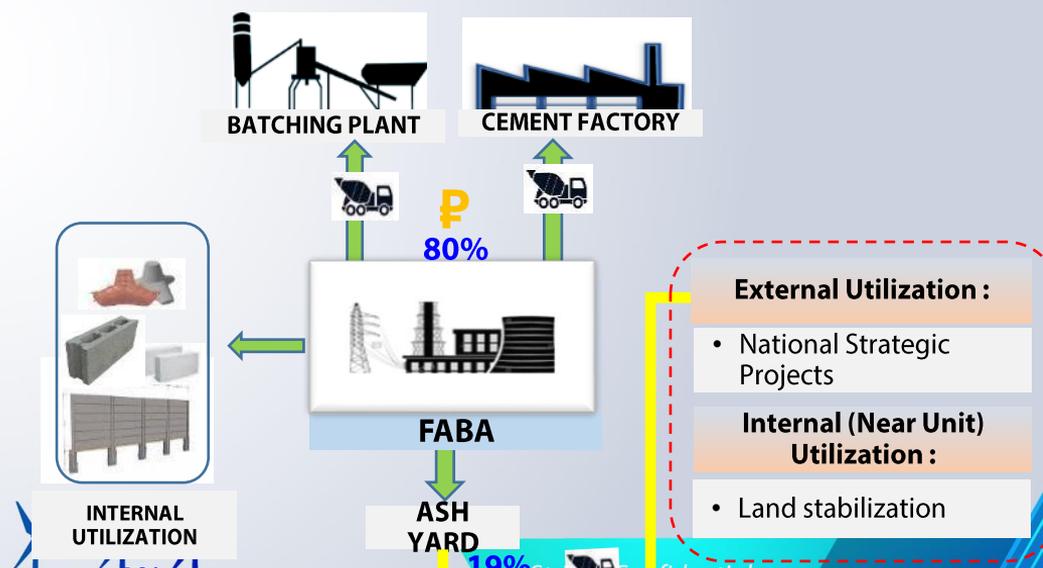

Changes in Government Regulation to increase FABA Utilization

1. In accordance with PP No.101 2014 FABA enacted as hazardous waste, with such strict regulations resulting in limited utilization and incurring high cost
2. The change of regulations from PP No.101 2014 to PP No.22 2021, FABA was enacted to Non Hazardous Waste, with more flexible regulations driving more massive utilization and lowering costs

BEFORE (FABA as HAZARDOUS WASTE)

AFTER (FABA as Registered Non HAZARDOUS WASTE)

Note : (FABA = Fly Ash and Bottom Ash)

Fly Ash & Bottom Ash PLN Group Utilization Map

01 SUMATERA island

CFSP (13 Unit)

1. Nagan Raya
2. Pangkalan Susu
3. Labuhan Ajin
4. Tanjung Balai Karimun
5. Tembilahan
6. Tenayan
7. Ombilin
8. Teluk Sirih
9. Bukit Asam
10. Tarahan
11. Sebalang
12. Air Anyir
13. Suge

436.043,75 Ton FABA
7.552 MW
 Utilization 1.542.160,29 Ton

02 JAVA island

CFSP (13 Unit)

1. Suralaya
2. Banten I Suralyaa
3. Lontar
4. Labuan
5. Pelabuhan Ratu
6. Adipala
7. Tanjung Jati B
8. Rembang
9. Pacitan
10. Indramayu
11. Tanjung Awar-awar
12. Paiton 1&2
13. Paiton 9

2.222.408,44 Ton FABA
19.594 MW
 Utilization 476.813,95 Ton

03 KALIMANTAN island

CFSP (7 Unit)

1. Asam-asam
2. Pulang Pisau
3. Teluk Balikpapan
4. Ketapang
5. Sanggau
6. Sintang
7. Bengkayang

136.880,88 Ton FABA
1.896 MW
 Utilization 17.675,25 ton

04 SULAWESI island

CFSP (5 Unit)

1. Amurang
2. Punagaya
3. Barru
4. NII Tanasa
5. Anggrek

79.168,67 Ton FABA
1.777 MW
 Utilization 77.763,87 ton

05 NUSRA Island

CFSP (4 Unit)

1. Roppa
2. Bolok
3. Sumbawa Barat
4. Jeranjang

35.622,08 Ton FABA
143 MW
 Utilization 26.141,26 Ton

06 MALUKU Island

CFSP (1 Unit)

1. Tidore

6.057,40 Ton FABA
166 MW

07 PAPUA island

CFSP (1 Unit)

1. Holtekamp

1.534,76 Ton FABA
160 MW

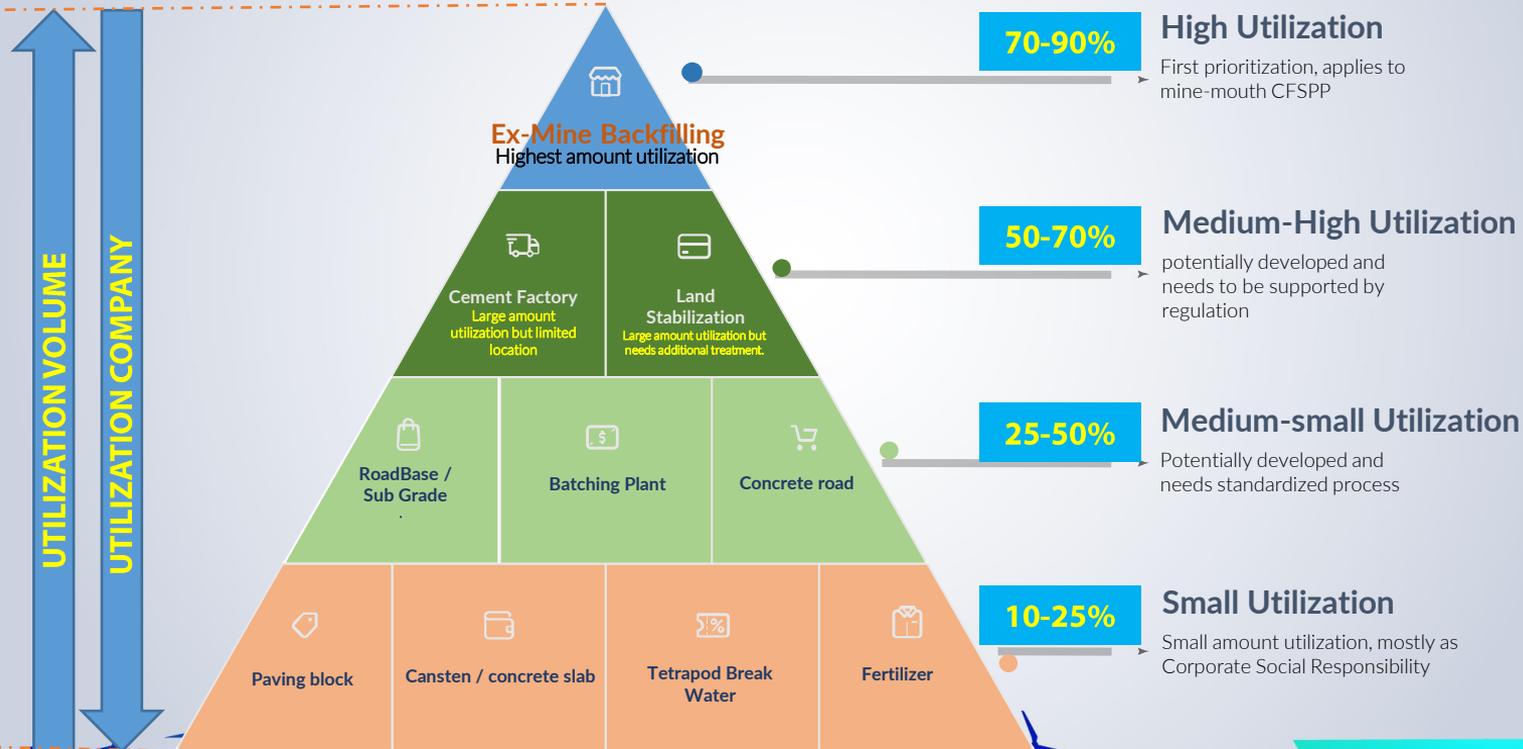

* Data Tahun 2020

Note : (FABA = Fly Ash and Bottom Ash)

Faba Utilization Hierarchy

FABA Utilization supports 4R and Nature Conservation Programs

4R :

1. Reduce
2. Reuse
3. Recycle
4. Replace

Fly Ash and Bottom Ash Utilization Products

Rehabilitation of mining land
 Sumatra, Kalimantan, Sulawesi have the potential to rehabilitate mining land through acid mining neutralization and mine pit reclamation

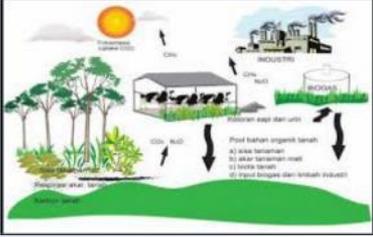

Community Empowerment through Circular Economy

Production rate :
 250 - 1000 pcs/day

- PLTU TJB
- PLTU Barru
- PLTU NII Tanasa
- PLTU Sebalang
- PLTU Suralaya 1-7
- PLTU Labuan

FABA for Fertilizer
 Fertilizer for agriculture

Material substitution

Land Stabilization

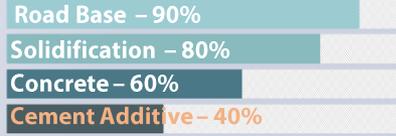

Bridge

Concrete

Percentage of FABA use :

FABA CREATIVE AND UTILIZATION

FABA UTILIZATION AS COVER LAYER FOR SOLID WASTE LANDFILL

Solid Waste Pile

1 Leveling of the solid waste cover layer

2 Compaction Process

3 Finish

- Positive Impact :**
- 1. Reduce Unpleasant Odors** that have been disturbing the surrounding community
 - 2. Reduce vector disease** in the rainy season such as mosquitoes including flies and rats
 - 3. Neutralizing Acidic leachate water** in the presence of ALKALINE FABA
 - 4. Helps in neatly organizing waste pile** The scattered piles of waste become neatly organized and aesthetically pleasing
 - 5. Save local government budgets** in providing waste cover materials

BOTTOM ASH UTILIZATION ON THE CONSTRUCTION PROJECT SURALAYA 9 – 10 CFSP

Jan 2022
PLN Consulting
Operational
Management
Karya Ujiono
Siti Nur

THE TOTAL OF FAB A UTILIZATION AS A SUB GRADE MATERIALS FOR THE SLA 9-10 CFSP CONSTRUCTION PROJECT ARE :

204,504.82 TONS PER JUNE 30, 2022

BEFORE Sept 19th 2022

Initial pH = 5-6.5 (Acid)

1. Location survey
2. Measure pH

AFTER Sept 27th 2022

The pH of the water becomes pH 7.2 – 8.2 (Alkali)

1. Adding FABA and compaction
2. Measure pH

LAND STABILIZATION

TOTAL FABА UTILIZATION 55.467 TON

**MATERIAL DEPLOYMENT USING DOZER
HEAVY EQUIPMENT**

**COMPACTION USING A VIBRATOR
ROLLER MACHINE WITH A THICKNESS
PER LAYER OF 25 CM**

FABA CONCRETE PRODUCT APPLICATION

COMPANY'S CSR PROGRAM FOR THE SURROUNDING ENVIRONMENT & STAKEHOLDERS THROUGH THE APPLICATION OF FABA CONCRETE PRODUCT

ECOPARK

PAVING BLOCK

SPORTS FACILITIES

PARKING AREA

THANK YOU.....

Terima kasih.....
